# Secure Enterprise Document Sharing

Pydio Cells gives you full control of your document sharing and collaboration environment, combining fast performance, huge file transfer sizes, granular security, and advanced workflow automation in an easy-to-set-up and easy-to-support self-hosted platform.

Is Pydio Cells the Right Solution for You?

There are lots of great document sharing and collaboration solutions out there. But If you answer yes to any or all of these 3 questions, Pydio is right for your organization:

✓ Do you need complete control of your document sharing?

✓ Do you need to share securely?

✓ Are shared cloud-based solutions off-limits due to compliance issues?

Sharing and Collaborating with Pydio

Productivity. Collaboration. Security.

Pydio Cells is an open-core, self-hosted Document Sharing & Collaboration platform specifically designed for organizations that need advanced document collaboration without security trade-offs.
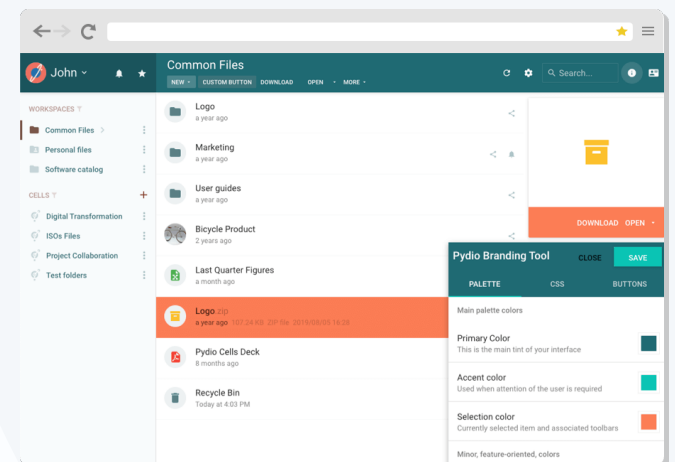

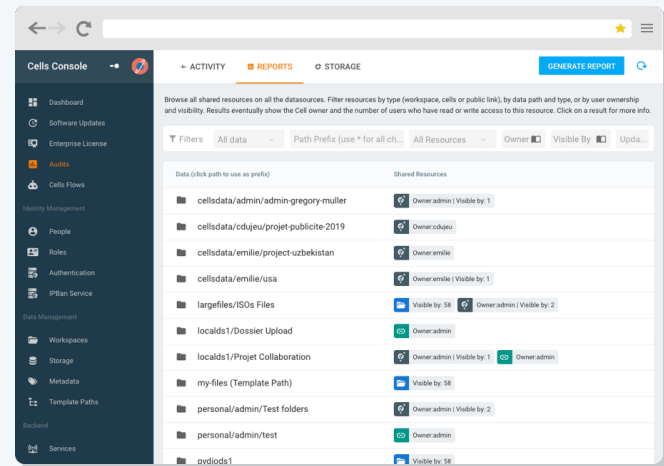

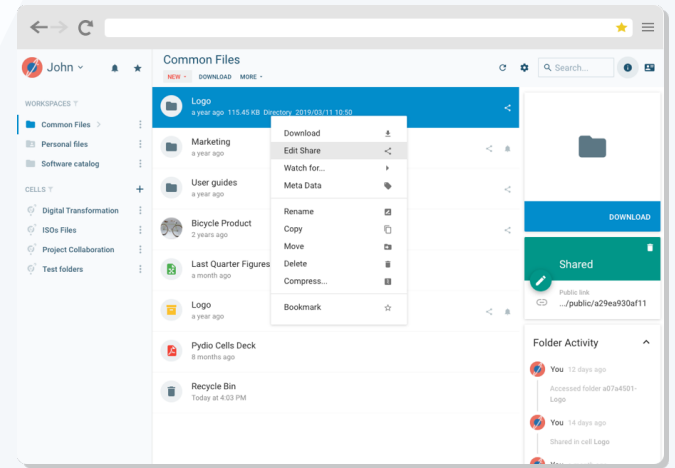

For Teams:
- ✓ Simplified, centralized document access
- ✓ Near-zero learning curve
- ✓ Secure mobile access via the Pydio app
- ✓ Cells Flows automates common workflows
- ✓ Fast transfers even for massive documents

For the Organization:
- ✓ Zero data leakage and full data sovereignty
- ✓ Reduces security risks (vs. SaaS platforms)
- ✓ High-performance Go core (vs. slow PHP)
- ✓ Multi-level permissions for data governance
- ✓ Compliance compliant (GDPR and beyond)
- ✓ Secure remote and mobile collaboration

For IT:
- ✓ On-prem, hybrid-cloud, private-cloud ready
- ✓ Fast deployment and rollout
- ✓ Fully scalable for the big data world
- ✓ Easy, safe SSO integrations
- ✓ Unifies all document sources via hardened API
- ✓ Cells Flows automates repetitive tasks

«We've been using Pydio for several years now and its ease of use and security features are what make it perfect for us. We manage more than 10 Pydio instances and they are at the heart of data exchange and collaboration with our customers.»

Jeremy Godefroy, Interpublic Group.
